

On October 14, 2021 in the administrative building of the Rehabilitation Center for Children with Oncohematological Diseases, the second press conference was held under the project BGLD-1.004-0001 "Rehabilitation Center for Children with Oncohematological Diseases" implemented by Kostinbrod Municipality

The areas of support, the target groups, the content of the individual work programs, the activities provided by the Center - art workshops, group psychotherapy, outdoor walks, bike rides, boat trips in the nearby dam, games in the indoor and heated pool, culinary were presented in detail.

The center's services have so far been used by a total of 32 families, some of them more than once, 15 teenagers and 21 siblings of children in the process of recovery. According to surveys, consumer satisfaction is 100% positive.

The center was also visited by representatives of the donor countries, and the project was presented by the team working actively with children and their families.
